DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one-year prior to the date of application for patent in the United States.

Claims 1,2,12,14,15 and 23-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Comeau et al 5,615,740.

Comeau discloses an apparatus and method for forming a cemented lateral junction (figure 1). A pre-machined opening 12 is formed in the sleeve. A cover 16 is disposed over the opening. Release material 18 is disposed at the cover. As to claim 2, the release material is on at least a portion of the cover exposed to the environment. As to claim 14, sleeve 10 is considered a liner sleeve. As to claims 15 and 26, the release material is on the entire cover, at least circumferentially. As to method claim 23, once the sleeve and cover are placed in the well, cement is pumped into the well and junction. As to claim 24, sleeve 16 is removed (see col. 4, lines 1-13). As to claim 25, once the cement is set, drilling is commenced through the opening 12 (see col. 4, lines 13-28). As to claim 27, the material used is cement. As to claims 28 and 29, opening 12 is oriented by use of a hook (see col. 4, lines 1-13).

Allowable Subject Matter

Claims 3-11 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 16-22 are allowed.
